Netronome Named One of Pittsburgh's Fastest Growing Companies

Leading developer of network flow processors experiences more than 500% growth in 2009

Pittsburgh – July 16, 2010 – Netronome, the leading developer of network flow processors, today announced that it has been named as one of the 2010 “Pittsburgh 100” companies by the Pittsburgh Business Times. The list is a ranking of Pittsburgh’s fastest growing, privately-held companies in the region. Companies are ranked by revenue growth between 2007 and 2009. Netronome, based in Cranberry Township, experienced sales growth of 511 percent in the last year alone.

"There are many growing companies in the Pittsburgh area and this year’s nominees clearly illustrate the continued growth of Pittsburgh as a business hub," said Alan Robertson, publisher of the Pittsburgh Business Times. "Over the past few years, Netronome has experienced record growth in both revenue and company expansion during one of the most difficult economic periods in our history."

Netronome Network Flow Processors are the industry’s only processor specifically designed for tight coupling with embedded multicore Intel® and x86 processors. The NFP-3240 brings breakthrough performance to a broad range of demanding network, security and content processing products used in 40 Gbps and 100 Gbps networks. It is the only line of processors backward compatible with the market-leading Intel IXP28XX. Netronome’s processors are supported by comprehensive tools, and a broad ecosystem of premier partners and suppliers.

"We are honored to be recognized by the Pittsburgh Business Times as one of the fastest growing companies in the area," said Niel Viljoen, Netronome’s CEO and founder. "Netronome is in its fourth year of record revenues and as the need for network flow processors continues to increase, we anticipate our market size and position expanding exponentially,"

The complete list of companies will be announced at an awards event scheduled to take place in Pittsburgh on August 26, 2010. The 2010 “Pittsburgh 100” supplement will be included in the August 27 issue of the Pittsburgh Business Times.

About Netronome

Netronome is a leading developer of highly programmable semiconductor products that are used for intelligent flow processing in network and communications devices. Netronome’s solutions include network flow processors and acceleration cards that scale from 10 to 100 Gbps. They are used in carrier-grade and enterprise-class communications products that require deep packet inspection, flow analysis, content processing, virtualization and security. Netronome’s products are developed in labs in Santa Clara, CA, Boxborough, MA and Pittsburgh, PA. To learn more about Netronome and its products, please visit www.netronome.com.
