

Total Performance. Total Control.™

## Netronome to Present at Linley Tech Seminar on Embedded Network Security Design

**PITTSBURGH, Penn. – July 15, 2008** – Netronome Systems, Inc., a leading developer of high-performance intelligent network processing solutions that provide content flow analysis, deep packet inspection and application acceleration for network and security appliances, today announced that Nabil Damouny is among the industry experts who will present at the Linley Tech Seminar on Embedded Network Security Design taking place July 16, 2008 at the DoubleTree Hotel in San Jose, California. Linley Tech Seminars consist of technical sessions focused on a single aspect of advanced technology for designers of security-focused networking and communications products.

The topic of Mr. Damouny's presentation is *Integrated Crypto Capability in Network Processing Silicon*. The discussion will focus on how Netronome's Network Flow Processor, the NFP-3200, accelerates a wide variety of security applications. The NFP-3200's on-chip network architecture provides high-throughput network processing, a robust set of modern cryptography algorithms and a high-performance PKI engine, combined in a multi-threaded highly-programmable environment. This level of integration makes the NFP-3200 line of Network Flow Processors ideally suited to serve as the complete data plane for security appliances.

### About The Linley Group

The Linley Group, the leading provider of independent technology analysis for networking, communications, and consumer electronics semiconductors, covers emerging areas such as high-speed embedded processors, Gigabit and 10G Ethernet, mobile communications processors, and more. The company provides in-depth technology reports and interactive seminars as well as strategic consulting services tailored to the individual client. To get free access to The Linley Group's analysis of recent news and events in these markets, subscribe to our e-mail newsletters at [www.linleygroup.com/npu/wire.html](http://www.linleygroup.com/npu/wire.html).

### About Netronome Systems

Netronome Systems, Inc. develops open, high-performance application acceleration and flow processing solutions for communications network devices, applications and appliances. Founded in August 2003, Netronome is a privately held corporation, headquartered in Pittsburgh, Pennsylvania. To learn more about the company and its products, please visit [www.netronome.com](http://www.netronome.com) or call +1.877.638.7629.
